

2007 OSHA Electrical Standard Updates

DATE: Thursday, September 20, 9 a.m. - 11 a.m.

Effective August 14, 2007, OSHA's new electrical standards take effect. These are the first changes to the electrical installation requirements in 25 years. The revised standard strengthens employee protections and adds consistency between OSHA's requirements and many state and local building codes, which have adopted updated National Fire Protection Association (NFPA) and National Electrical Code provisions.

Changes to OSHA's general industry electrical installation standard focus on safety in the design and installation of electric equipment in the workplace. The updated standard includes a new alternative method for classifying and installing equipment in Class I hazardous locations, new requirements for ground-fault circuit interrupters (GFCI) and new provisions on wiring for carnivals and similar installations.

The final rule updates the general industry electrical installation requirements to the 2000 edition of the NFPA 70E, which was used as the foundation of the revised standard.

Join us for a 2-hour *webinar—choose to attend in person (EIGERlab, Rockford IL) or log in from your computer as we address the changes specific to the adoption of this new rule. We will:

1. Discuss the new rules and how they differ from existing rules.
2. Identify steps needed to ensure your organization is in compliance.

■ What is a Webinar?

A Webinar is a seminar which is conducted over the World Wide Web. It is designed to be interactive between the presenter and audience. A webinar is 'live' in the sense that information is conveyed according to an agenda, with a starting and ending time. With this Webinar, one person (a site) registers for the conference. After registration, you will be sent a confirmation code and instructions. At the specified time, a person uses their computer to access the site via the internet.

■ What are the benefits?

The webinar provides an attractive vehicle for the audience to access up-to-date information on focused topics in a timely, cost effective way (low registration fee per site and no travel expenses) and provides an opportunity for attendees to participate in the program at his or her desk or in small groups.

Course # BPI 562 922

■ Four easy ways to register:

Phone: (815) 921-2071 **Fax:** (815) 921-2079 **E-Mail:** T.Stacy@RockValleyCollege.edu
Mail: BPI, Rock Valley College, 3301 N. Mulford Rd., Rockford, IL 61114

■ Cost: \$95.00

A copy of the new Electrical Standards will be available at the conclusion of the Webinar.
